

## Other Information

# Corporate History

1927	April	Keisuke Shiwaku established FUJI SHOKAI in Sugamo, Tokyo  Started production and sales of gummed tape for packaging
1931	August	FUJI SHOKAI was reorganized and FUJI GOMEI KAISHA was established (relocated to Itabashi, Tokyo)
1934	October	FUJI GOMEI KAISHA was reorganized and FUJI SHIKO CORPORATION was established
1960	March	Started production and sales of adhesive paper for labels and later commenced production and sales of adhesive film
1972	March	Started production and sales of labeling machines
1984	October	Company name was changed to FSK CORPORATION
1986	July	Listed on the 2nd Section of the Tokyo Stock Exchange  Developed UV-curable dicing tape and made full-scale entry into the semiconductor-related product field
1987	September	MADICO, INC., became a subsidiary in the U.S.
1989	March	Approved for listing on the 1st Section of the Tokyo Stock Exchange
1990	April	Merged with SHIKOKU PAPER CO., LTD., and SOHKEN KAKO CO., LTD., and company name was changed to LINTEC Corporation  Expanded range of business activities from the fields of adhesive paper and film and related equipment to include specialty paper and release paper and film
1991		Made full-scale entry into the optical display-related business
1994	May	PT. LINTEC INDONESIA was established
1995	January	MODERN PLASTIC INDUSTRIES CO., LTD., became a subsidiary (merged in April 1996)
	April	LINTEC SINGAPORE PRIVATE LIMITED was established  LINTEC EUROPE B.V. was established
	December	Construction of new building at the Research Center
1999	March	LINTEC INDUSTRIES (SARAWAK) SDN. BHD. was established
2000	April	LINTEC INDUSTRIES (MALAYSIA) SDN. BHD. was established
	July	LINTEC ADVANCED TECHNOLOGIES (TAIWAN), INC., was established

2001	December	LINTEC ADVANCED TECHNOLOGIES (KOREA), INC., was established
2002	June	LINTEC (SUZHOU) TECH CORPORATION was established
	August	LINTEC SPECIALITY FILMS (KOREA), INC., was established
2003	June	LINTEC ADVANCED TECHNOLOGIES (PHILIPPINES), INC., was established
	August	LINTEC SPECIALITY FILMS (TAIWAN), INC., was established
	October	LINTEC ADVANCED TECHNOLOGIES (EUROPE) GMBH was established
2004	February	LINTEC ADVANCED TECHNOLOGIES (SHANGHAI), INC., was established
	August	LINTEC ADVANCED TECHNOLOGIES (MALAYSIA) SDN. BHD. was established
	September	LINTEC KOREA, INC., was established
2009	June	LINTEC VIETNAM CO., LTD., was established
2010	August	Completed reconstruction work at the Tatsuno Plant
2011	June	LINTEC (THAILAND) CO., LTD., was established
2012	November	LINTEC INDIA PRIVATE LIMITED was established
2013	December	Nano-Science & Technology Center was established
2015	January	LINTEC ASIA PACIFIC REGIONAL HEADQUARTERS PRIVATE LIMITED was established
	May	Construction of Advanced Technology Building at the Research Center
2016	October	VDI, LLC, became a subsidiary in the U.S.
	November	LINTEC GRAPHIC FILMS LIMITED became a subsidiary in the U.K. (currently LINTEC EUROPE (UK) LIMITED)
	December	MACTAC AMERICAS, LLC, became a subsidiary in the U.S.
2021	April	DURAMARK PRODUCTS, INC., became a subsidiary in the U.S. (merged with subsidiary MACTAC AMERICAS, LLC, in December 2021)
2022	February	Acquired a business from a U.S. manufacturer of adhesive products and established SPINNAKER PRESSURE SENSITIVE PRODUCTS LLC
	April	Owing to the Tokyo Stock Exchange's readjustment of market categories, moved listing to the Prime Market

## Glossary

<p><b>Adhesive products for labels</b></p>	<p>These include plain adhesive paper / adhesive film before printing patterns, text, etc., or variable information such as barcodes. The lineup includes a paper base used for a wide range of applications and a film base with superior durability, water resistance, and design.</p>
<p><b>Automobile-use adhesive products</b></p>	<p>These include film for replacing paint in door sashes, film for protecting aluminum wheels on new cars, and decorative film for motorcycles, etc.</p> 
<p><b>Biomass</b></p>	<p>Biomass is organic material derived from plants. By using biomass materials in facestock and adhesive for labelstock, environmental load can be reduced in terms of CO<sub>2</sub> emissions and preserving fossil resources.</p>
<p><b>Carbon nanotubes</b></p>	<p>Carbon nanotubes are cylindrical carbon materials measuring one nanometer (one billionth of a meter) in diameter. Lightweight, they are highly resistant to bending and stretching, and have high electrical and thermal conductivity.</p>
<p><b>Casting papers for carbon fiber composite materials</b></p>	<p>This release paper is used as a base sheet for manufacturing composite materials composed of a sheeted form of fine, hair-like carbon fibers fixed with resin.</p>
<p><b>Casting papers for synthetic leather</b></p>	<p>In the manufacturing process for synthetic leather, this release paper is used as patterns for adding designs and gloss to the leather surface.</p>
<p><b>Films for outdoor signs and advertising</b></p>	<p>This is adhesive film for signs installed outdoors, for body advertisements and decorations for trains and buses, and other applications.</p>
<p><b>Hot melt</b></p>	<p>Hot melt is a room temperature solid type of adhesive that is applied while being melted with heat. Environmental load can be reduced because dilution by organic solvents is not needed during application.</p>
<p><b>Industrial-use adhesive tapes</b></p>	<p>These industrial-use adhesive products include double-sided tape that is used for attachment and bonding of precision components of mobile devices, such as smartphones, as well as low-adhesive tape that is used for blanking and transportation of LCD components.</p> 
<p><b>Interior finishing mounting films</b></p>	<p>This decorative film can achieve creation of diverse interior spaces through attachment to interior walls, etc. In addition to materials with various textures and colors, it also takes on original design decorations by digital output.</p> 

<b>Labeling machines</b>	This equipment is used to automatically affix labels to objects, including models that incorporate printers for the printing of logistics addresses, barcodes, etc.	
<b>Multilayer ceramic capacitor-related tapes</b>	This release film is used in forming hundreds of ultra-thin ceramic layers to configure the interior structure of capacitors.	
<b>Optical display-related adhesive products</b>	These include adhesive processed products on optically functional film used in LCD and OLED displays, and adhesive sheets used to adhere parts and materials in touch screens.	
<b>Semiconductor-related adhesive tapes</b>	This specialty adhesive tape is used in semiconductor manufacturing back-end processes. It is used to protect the circuit surface when thinning semiconductor wafers through grinding, to secure wafers during dicing, etc.	
<b>Semiconductor-related equipment</b>	These products, which are used in semiconductor manufacturing back-end processes, include equipment for laminating / removing semiconductor-related adhesive tape and for UV irradiation of tape to control adhesion of the tape.	
<b>Special function papers</b>	These include specialty paper with high functionality, such as dust-free paper for use in places like clean rooms and washing-resistant paper that withstands tearing even when wet, used in cleaning tags, and oil- and water-resistant paper suitable for food packaging, keeping water and oil from seeping out.	
<b>Specialty papers</b>	This is paper used in special applications with a variety of colors, textures, and functions, etc. It includes the color paper for envelopes, colored construction paper, and high-grade printing paper, as well as paper with waterproofing and other special functions.	
<b>Window films</b>	This adhesive film is applied to window glass in buildings, automobiles, etc. It has various effects such as improving air-conditioning efficiency in rooms and vehicles, shielding ultraviolet rays, and reducing the scattering of splinters when glass is broken.	

### Diagram of Adhesive Products for Labels

#### Adhesive

In line with purpose and application, it can be selected from a permanent type, a removable type, or a re-applicable type.

#### Release paper / film

In addition to the protection of the adhesive surface, the paper or film is used as a base during label manufacturing and processing.

#### Facestock

Broadly divided, there are two types—paper and film—and can be selected based on the application, usage environment, and required performance.
