1. Qualitative Information on Quarterly Financial Results

(1) Explanation of Operating Results

For the cumulative third quarter of the current consolidated fiscal year, although demand for semiconductor and electronic component-related products remained solid, the performance of the Group's business saw a decrease in net sales year-on-year due mainly to the impact from the closure of subsidiaries in South Korea and Taiwan, as well as the impact of foreign exchange rates.

In terms of profitability, results declined year-on-year due mainly to the impact of rising prices of fuel and raw materials, an increase in fixed costs including labor costs, and foreign exchange rates.

As a result, net sales were 236,826 million yen (down 0.9% year-on-year), operating income was 19,796 million yen (down 3.3% year-on-year), ordinary income was 19,899 million yen (down 7.8% year-on-year), and profit attributable to owners of parent was 13,998 million yen (down 13.3% year-on-year).

The outline by segment was as follows:

[Printing and Industrial Materials Products]

	Cumulative third quarter of the previous consolidated fiscal year	Cumulative third quarter of the current consolidated fiscal year	year-on-year	
			Change	Rate of change
	Millions of yen	Millions of yen	Millions of yen	%
Net sales	139,475	136,539	(2,936)	(2.1)
Printing & Variable Information Products Operations	110,761	108,380	(2,381)	(2.1)
Industrial & Material Operations	28,713	28,158	(555)	(1.9)
Operating income	4,890	2,285	(2,605)	(53.3)

Despite favorable performance in Japan, net sales in this segment were 136,539 million yen (down 2.1% year-on-year), due mainly to changes in the sales mix and the impact of foreign exchange rates at the subsidiary in the United States. Operating income was 2,285 million yen (down 53.3% year-on-year), due mainly to a decrease in sales in the United States and the rising prices of fuel and raw materials, and cost of logistics, as well as the impact of an increase in fixed costs in Japan and the United States.

Sales by operation of this segment were as follows:

(Printing & Variable Information Products Operations)

As for adhesive products for seals and labels, in Japan, demand for medical and logistics applications was almost on par with the previous year, but sales of those related to food products, beverage campaigns and eye-catching labels remained sluggish. Outside Japan, the United States saw an increase in sales volumes, but overall sales declined due mainly to changes in the sales mix and the impact of foreign exchange rates. In addition, demand remained sluggish in China and the ASEAN region. As a result, net sales in this operation were 108,380 million yen (down 2.1% year-on-year).

(Industrial & Material Operations)

Japan saw an increase in sales of solar control window films for building- and automobile-use, and sales of automobile-use adhesive products remained solid. Overseas, demand for security window films declined in the United States, and sales of automobile-use adhesive products decreased in the ASEAN region. As a result, net sales in this operation were 28,158 million yen (down 1.9% year-on-year).

[Electronic and Optical Products]

	Cumulative third quarter of the previous consolidated fiscal year	Cumulative third quarter of the current consolidated fiscal year	year-on-year	
			Change	Rate of change
Net sales	Millions of yen 72,991	Millions of yen 73,643	Millions of yen 652	% 0.9
Advanced Materials Operations	63,898	67,337	3,438	5.4
Optical Products Operations	9,092	6,305	(2,786)	(30.6)
Operating income	14,938	16,592	1,653	11.1

Despite the impact from the closure of subsidiaries in South Korea and Taiwan, net sales in this segment were 73,643 million yen (up 0.9% year-on-year), due to continued strong demand for semiconductor and electronic component-related products. Despite increased fixed costs such as depreciation for newly enhanced production capacity, operating income was 16,592 million yen (up 11.1% year-on-year), due to an increase in sales volumes of semiconductor and electronic component-related products.

Sales by operation of this segment were as follows:

(Advanced Materials Operations)

Although sales of semiconductor-related devices decreased due to a lull in those for HBM manufacturing use, semiconductor-related adhesive tapes performed well due to reasons such as increased demand related to generative AI. Sales of multilayer ceramic capacitor-related tape were also solid, driven by increased demand for high-end products for data centers and smartphones. As a result, net sales in this operation were 67,337 million yen (up 5.4% year-on-year).

(Optical Products Operations)

Although sales of adhesive tapes for OLED displays were solid, overall sales declined due to the impact from the closure of subsidiaries in South Korea and Taiwan. As a result, net sales in this operation were 6,305 million yen (down 30.6% year-on-year).

[Paper and Converted Products]

	Cumulative third quarter of the previous consolidated fiscal year	Cumulative third quarter of the current consolidated fiscal year	year-on-year	
			Change	Rate of change
Net sales	Millions of yen 26,559	Millions of yen 26,643	Millions of yen 84	% 0.3
Fine & Specialty Paper Products Operations	11,263	10,781	(481)	(4.3)
Converted Products Operations	15,296	15,862	565	3.7
Operating income	601	857	256	42.6

Although sales in Fine & Specialty Paper Products Operations were sluggish overall, net sales in this segment were 26,643 million yen (up 0.3% year-on-year), due to a solid sales of release papers and release films in Converted Products Operations. Despite the impact of rising prices of fuel and raw materials, and cost of logistics, operating income was 857 million yen (up 42.6% year-on-year), due to the decrease of operating loss by the previously recorded impairment losses on non-current assets pertaining to the Fine & Specialty Paper Products Operations and an increase in sales volumes in Converted Products Operations.

Sales by operation of this segment were as follows:

(Fine & Specialty Paper Products Operations)

Despite solid sales of industrial speciality papers, sales of core products like color papers for envelopes, and oil- and water-resistant papers were sluggish due to lower demand. As a result, net sales in this operation were 10,781 million yen (down 4.3% year-on-year).

(Converted Products Operations)

Despite a decrease in sales of casting papers for synthetic leather, sales of release papers for electronic materials and release films for optical-related products remained solid due mainly to increased demand for smartphones. Sales of casting papers for carbon fiber composite materials also experienced growth. As a result, net sales in this operation were 15,862 million yen (up 3.7% year-on-year).
